REVIEW OF PERMIT, PERFORMANCE STANDARDS & PERMIT CONDITION REQUIREMENTS

Instructions

- Substantiate the elements on this inspection by checking the appropriate performance standard.
 - For complete inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check N/A.
 - For partial inspections check only the elements evaluated.
- Document any noncompliance situation by referencing the NOV issued at the appropriate performance standard listed below.
- Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
- Provide a brief status report for all pending enforcement actions, permit conditions, Division Orders, and amendments.

PERMIT NUMBER: ACT/015/009

DATE OF INSPECTION: 8/16/2000

(Comments are Numbered to Correspond with Topics Listed Above)

1. PERMITS, CHANGE, TRANSFER, RENEWAL, SALE

The permit embraces 3,538.98 acres, of which 10.7 acres are disturbed. The reclamation agreement is on file and is dated April, 1992.

No new amendments have been submitted to the Division.

4A. HYDROLOGIC BALANCE: DIVERSIONS

Two undisturbed culverted diversions are in place. Cottonwood Creek is the only perennial diversion. There is one undisturbed concrete diversion that collects and routes runoff to the sediment pond. The culverts and concrete ditch were functional. Water was reporting to the concrete ditch from the tipple wash process.

4B. HYDROLOGIC BALANCE: SEDIMENT PONDS AND IMPOUNDMENTS

The sediment pond lies immediately below the mine site. This provides the sediment control for the majority of the disturbed area. The pond was cleaned last fall.

The sediment pond was not discharging; no hazardous conditions were noted during the inspection.

4C. HYDROLOGIC BALANCE: OTHER SEDIMENT CONTROL MEASURES

There are two BTCA areas; one is located above the parking lot. The other lies below the sediment pond. Both appeared to be functioning as designed.

4E. HYDROLOGIC BALANCE: EFFLUENT LIMITATIONS

The mine was discharging mine water into the permitted undisturbed drainage. The meter was jumping between 200 and 300 GPM. Dennis Oakley took samples and recorded the volume at 250 GPM.

8. NONCOAL WASTE

All noncoal waste which is generated by the operational stage is temporarily stored on the surface. It is permanently disposed of at a land fill. A used oil container is adjacent to the fuel storage within a concrete containment structure.

Some litter was observed in the parking lot. It will be removed by the permittee.

18. SUPPORT FACILITIES-

No new support facilities have been permitted for the mine site.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
